Begin

After first start of the game program will ask you for choosing language. Czech and English are available.

After this you will see a short introduction.

Controls

You can move with arrow keys and jump with space. All dialogs you can close with Esc. You can also press F1 for menu. There are next few options. You can select items on hot bar with num keys 1-5. Other shortcuts:

Exit game	Use block/item	Inventory
Q	W	E
A	S	D
Place block	Save	Destroy block

Saving

You have to save game with a keyboard shortcut or in menu. After next start of the game the last save will be loaded.

Inventory

You can show your inventory with E. You can drag and drop things there. Items can be moved to the hot bar. You can do some things with them (visit Controls for more info). When is your inventory full you can not destroy block.

Fabricator

Fabricator is available from the whole start of the game. It is located next to the life pod.

You can make some thing with it from thing in your inventory. How you can get resources you can find in Game world section.

Life pod

You were delivered to the planet by your life pod but it was damaged like your ship and it was destroyed after landing. You can repair it with the electrical kit from fabricator. Use it with W. You can travel to other planets with it.

Game world

After landing you are on your home planet but you can travel to other with repaired life pod. You must complete an asteroid mini game before landing to other planets. After exiting other planet it will be deleted. Only your home planet is saved. All planets are generated randomly. There are two types of planets to visit. Your home planet is only one. You can find some nice stuff on planets.

There are three types of ores on every planet – gold, iron and copper. They can be used in the fabricator.
